BIGGER THAN RACE[®]

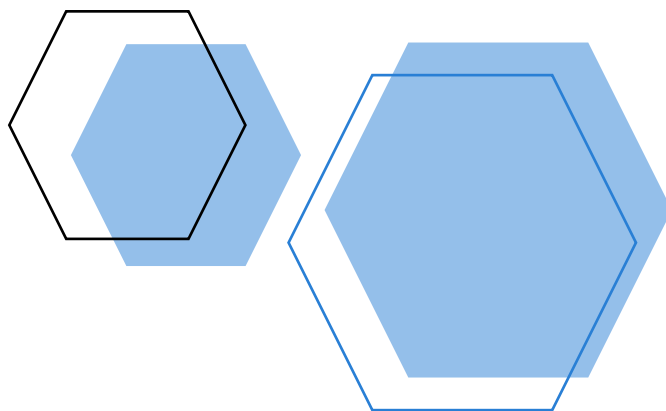

'INVESTIGATE TRUTH ON YOUR OWN TERMS'[®]

INTRODUCTION

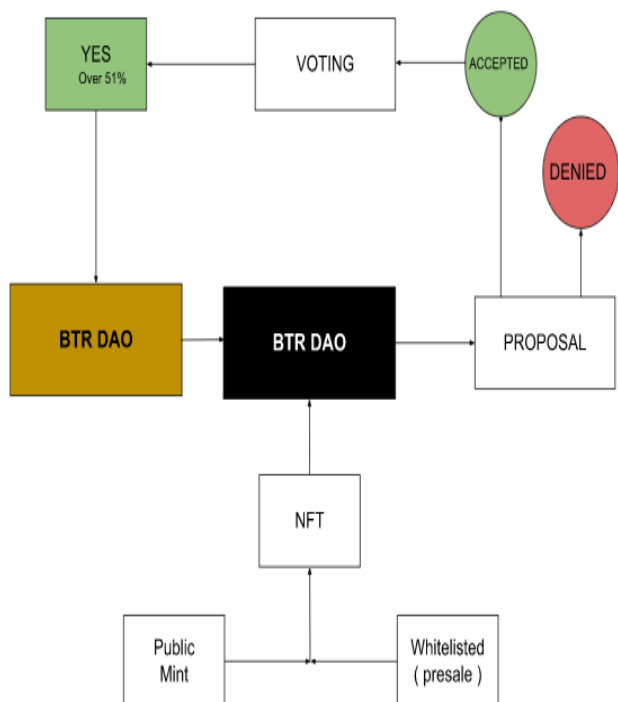

Blockchain is the future. There's no doubt about it. Countries and mega corporations are adopting it at a speed we could have never imagined. It unleashes the possibilities of the new digital world. As leaders of the BTR (Bigger Than Race), we have decided, due to demand by the members of the community, to release our own project that will benefit mainly the Patreon members that contribute and are a part of BTR. This whitepaper will explain how it will work and be a sustainable reward system for those who contribute. We believe that this project will benefit those who cannot participate in specific tasks and give access to unique opportunities such as nodes, etc.

SO...HOW DOES IT WORK?

Members of Patreon will have NFTs (Non-Fungible Tokens) and will use them to vote when we have proposals and when making certain decisions. The reason for this is that we want all members' vote to be equal and not overpowering. Therefore, this becomes decentralized and possesses the true nature of blockchain, where everyone's vote counts. Also, these NFTs will be different for different tiers, and voting power will be different. As leaders, Brando and SparksFlames will not be able to vote, and therefore the decisions are made entirely by the community. Please note: This is an investment club, and only 100 members can participate due to regulations stipulated by the SEC.

The blockchains that have been chosen for usage are Polygon & Binance chain. Contract Addresses will be available in V2 of the BTR Whitepaper.

OKAY...HOW DOES IT HAPPEN?

Question: How will this be funded?

On the 28th of September 2022, Brando held a call where those who attended would contribute 10 percent of their OCAVU gains towards the project's funding. So, in short, the community members will be funding the project. We also have our Lead Developer, Jossif Elefteriadis, who will be instrumental in creating the NFTs and mechanics of the project. We are working on many ideas. For one, We will also use the funds to purchase nodes from Myria, Gala and other projects to generate an income. We will track who gave how much so we can break down the rewards to be provided. We will keep you updated as the project progresses.

WELL, WHO ARE THE TEAM PLAYERS?

BRANDO 'THE CRYPTO WIZARD' MURPHY

Brando is a veteran of crypto. In 2016, he started investigating cryptocurrency, which led to the famous 2017 bull market. He founded Bigger Than Race® in 2012 and rebranded it into what it was today in 2017. His qualifications include Certification in Web3/Metaverse through EveryRealm, a venture fund and leader in Metaverse innovation and development and Certified in Blockchain and Bitcoin through IBM. His primary vision and goal are to help people become financially free through Blockchain technology and to be able to invest and own the infrastructure of the new economy of the 4th Industrial Revolution. His passion is very noticeable. He resides in Los Angeles, CA.

SPARKSFLAMES

Known for her distinctive accent, SparksFlames became a part of BTR in 2020. After meeting with Brando, she decided to join and become an active member. She is currently studying for a qualification in blockchain and enjoys updating the BTR community continuously. She and Brando share the common goal of helping many become financially independent and achieve wealth and the degrees of aspirations we intend to do. Besides crypto, she enjoys hobbies like walking and gaming. She resides in South Africa.

Jossif Elefteriadis

Jossif is the Lead Developer for the project. He believes that smart contracts with blockchain technology will change the Internet forever. He helps many Web 2.0 developers transition into the Web 3.0 world. His skills include HTML, CSS, JavaScript, Solidity and many more. The projects he has worked on are LearnWeb3DAO and MYNFT, amongst other hackathon-winning applications. Besides coding, he loves sports, mainly Padel, Basketball and Gym. He resides in Sweden.
